

REGOLAZIONE SPECCHI RETROVISORI

244 - Ducato

EXTERIOR MIRRORS ADJUSTMENT DESCRIPTION

Both door mirrors are adjusted using a joystick-typed control located near the mirror. The upper mirror section and/or lower mirror section may be adjusted within each door mirror. This is made possible by a switch that selects the door mirror (right or left) and the mirror section (upper or lower).

The button controls two electrical motors located in each of the two mirrors: a motor controls movements of the upper mirror (horizontal and vertical). The other controls movements of the lower mirror section (horizontal and vertical).

The door mirror adjustment circuit is protected by a dedicated fuse located in the junction unit under the instrument panel.

Adjustment is possible only with the key ON (INT).

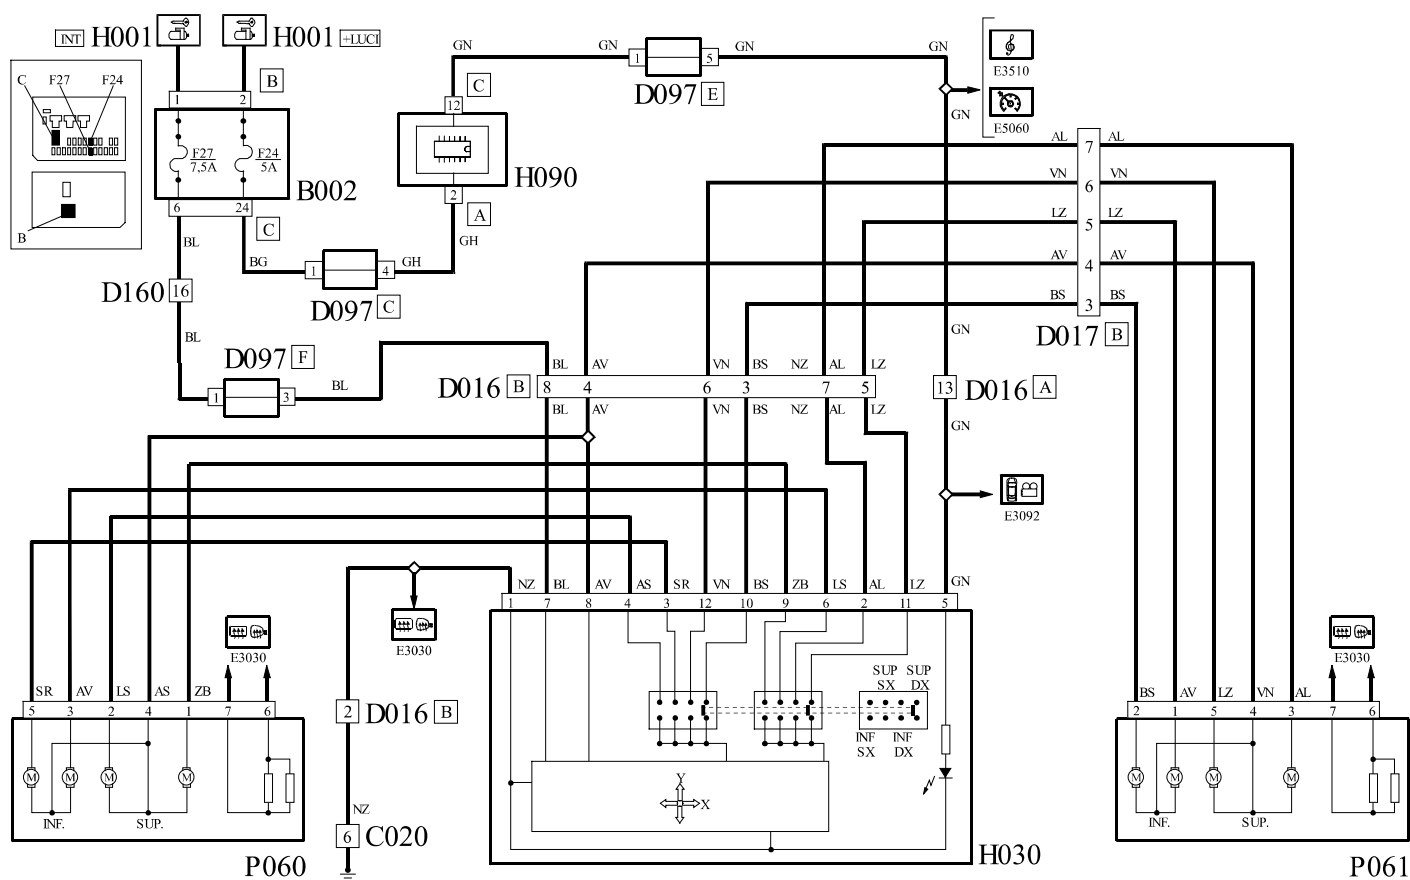

EXTERIOR MIRRORS ADJUSTMENT OPERATIONAL DESCRIPTION

Control device H030 allows the selection and movement of the door mirror required, left or right, upper or lower. The device receives an ignition-operated power supply, protected by fuse F27 located in underfacia junction unit B002. Door mirrors P060 and P061 receive controls to move the relevant mirrors:

- pins 5 and 3: upper mirror movement;
- pins 2 and 1: lower mirror movement;
- pin 4 : shared supply supplied by switch H030.

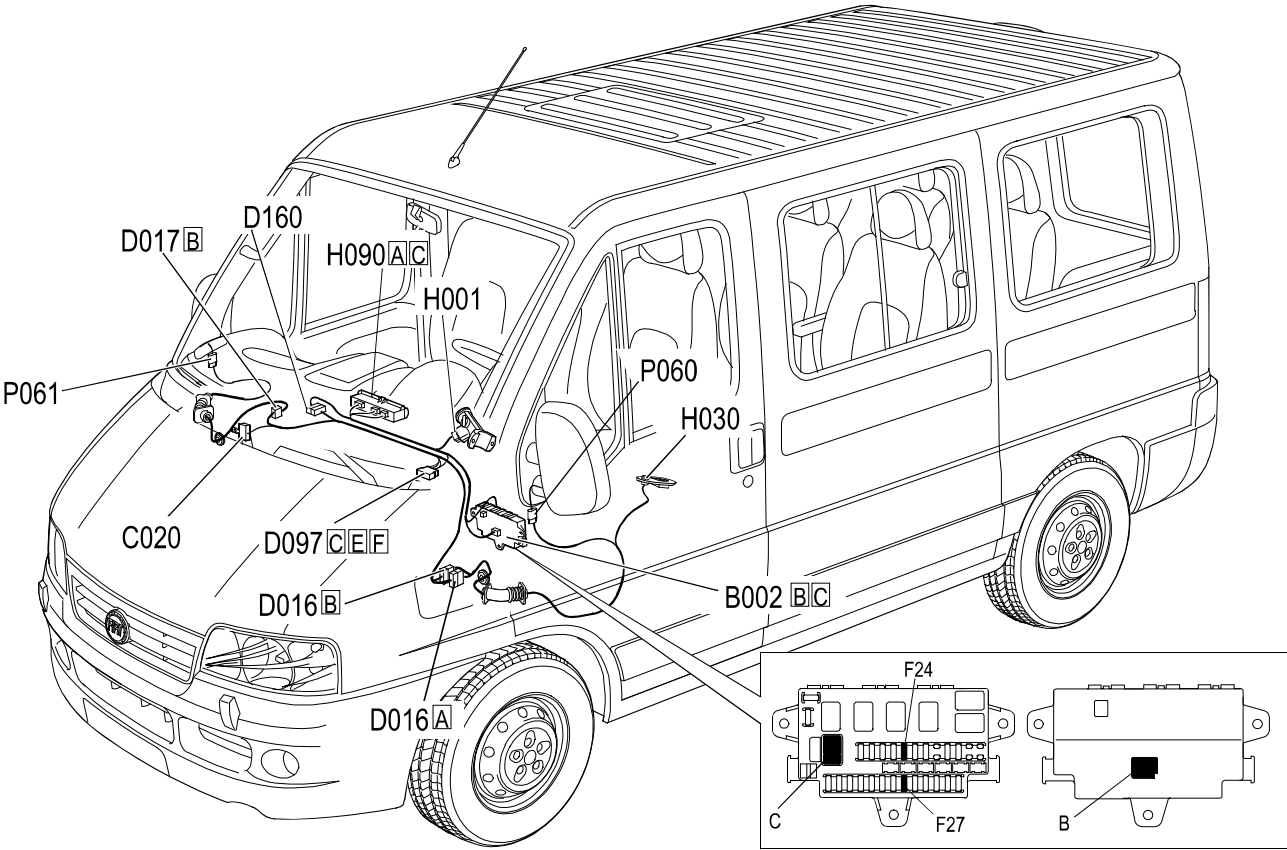

Control device H030 contains interior lighting that is activated whenever side lights are turned on - pin 5. It is connected to earth C020 via pin 1.

EXTERIOR MIRRORS ADJUSTMENT WIRING DIAGRAM

Component code	Description	Reference to the assembly
B002	JUNCTION UNIT UNDER DASHBOARD	-
D016	ADDITIONAL DASHBOARD/LEFT FRONT DOOR COUPLING	-
D017	ADDITIONAL DASHBOARD/RIGHT FRONT DOOR COUPLING	-
D097	SHORT CIRCUITING COUPLING	-
D160	DASHBOARD/OPTIONAL DASHBOARD COUPLING	-
H030	ADJUSTABLE MIRRORS CONTROL	-
H090	SWITCH CONTROL PANEL	-
P060	DRIVER'S DOOR MIRROR	-
P061	RIGHT EXTERNAL REAR VIEW MIRROR	-
